(54) IMAGE PROCESSING SYSTEM, IMAGE  
 PROCESSING METHOD FOR THE SAME AND  
 STORAGE MEDIUM STORING COMPUTER  
 READABLE PROGRAM

(57) Abstract

**PROBLEM TO BE SOLVED:** To efficiently execute compound image processing while automatically selecting the constitutive unit to be used only by setting a simple image processing mode even when plural constitutive units to compete in network resources exist.

**SOLUTION:** A system controller 101 collects function resource information through communication with the plural constitutive units of different functions or the same function on a network 100. Then, the combination of constitutive units to be used is determined by discriminating whether all the functions divided into constitutive units can be executed or not in the case of image processing mode execution to be set by management for each constitutive unit.
